

To Prestige Roofing & Construction in Broken Arrow Ok.

I am incredible pleased with the Workmanship of the Team that was sent to repair the Soffit and Fascia on the front side of my home, that was rotted, and a section had fallen off.

They were both professional. The younger one worked like he was on a mission, and the other gentleman was goal oriented and observant, he even found on the side gutter drain that goes into the ground had a long plastic like material that was clogging up that section of the gutter and drain causing it to back up to where the main problem of the fascia and soffit was rotting, he cleared all of that out checked to make sure there was nothing else, so now it can drain as it should. I do believe that no other company would have looked there for any problems.

I had a new roof put on 7 months ago through another roofing company, I did not know of Prestige Roofing at that time or I would have hired them. Before the new roof was placed I had rain water leaking on my bedroom ceiling and also the living room ceiling, The roofer found the source of leakage in the bedroom but could not find the leak source in the living room, so the new roof was placed.

Prestige Roofing team found the problem and made the repairs so it will not happen again, they went above and beyond to ensure that my home was taken care of.

Prestige team worked well together, everything was done in a timely manner, they cleaned up what they needed to.

From the Owner to Construction Team to Office Staff they are courteous, polite, and honest.

I will tell anyone who needs Roofing or any construction that goes with it to check out Prestige Roofing in Broken Arrow OK, you will not be sorry.
